PROJECTS

Bug Tracker — *Issue Tracking Web Application*

Led complete lifecycle of bug tracker app, employing .NET Framework: architecture, coding, deployment.

Implemented ASP.NET for user authentication, role-based authorization, and data security.

Integrated front-end libraries, refining UI/UX and optimizing issue management workflow.

Live Demo - https://bugtracker-brianley.up.railway.app/

Byte Banter — *Blog Web Application*

Created and maintain a tech blog featuring coding challenges, dev insights, and coding tutorials.

Blog - https://blog-brianley.up.railway.app/
